PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 4+ years of experience building scalable, high-performance web applications using Angular, React, and Node.js. Delivered production systems serving 100,000+ users, optimized application performance by 25%, and automated workflows, reducing manual effort by 40%. Expertise in end-to-end architecture, REST APIs, NgRx state management, and responsive UI development, with a strong focus on clean, maintainable, and test-driven code.

CORE SKILLS AND TOOLS

- **Frontend:** Angular 11+, React, Ionic, TypeScript, JavaScript (ES6+), HTML5, CSS3
- **Testing:** Jasmine, Karma, Jest
- **State Management & Routing:** NgRx, Redux, RxJS, Angular Services, Guards, Lazy Loading
- **Tools:** Git, Postman, VS Code, JIRA
- **Development Practices:** Agile (Scrum), CI/CD, GitLab/GitHub
- **Backend :** Node.js, Express.js (REST APIs, authentication, integrations)
- **Databases:** MongoDB, MySQL

PROFESSIONAL EXPERIENCE

BIGSHIP

Frontend Developer

05/2024 – present
Noida, India

- **Bigship International User/Admin Panel**- Designed and developed scalable web applications serving **100,000+ users**, improving order processing efficiency by **30%**
- Led integration of third-party services (Google Maps, Ola Maps), reducing manual order assignment effort by **40%** and improving delivery efficiency.
- Delivered **~95% pixel-perfect UI accuracy**, reducing design-to-development gaps and minimizing UI rework by **~20%**
- Improved application performance by 25% by implementing lazy loading, optimizing API calls, and enhancing RxJS state management.
- Provided technical guidance and code reviews for a team of developers, improving code quality and reducing bugs in production
- Recognized with **Excellence & Ownership Award** for demonstrating strong ownership, leading critical feature development, and improving system efficiency

BIDIPlus

Software Engineer

10/2023 – 05/2024
Bangalore, India

- Increased test coverage from 20% to 85% using Jasmine & Karma, boosting release confidence and reducing regressions.
- Built and owned secure Angular modules used across multiple features, improving system scalability and maintainability
- Developed predictive dashboards for chatCdp.ai, enabling faster decision-making and reducing data analysis time by **30%**
- Collaborated in Agile teams and contributed to code reviews and knowledge sharing, improving team delivery efficiency.

Infiniseasoft

Software Engineer

02/2022 – 10/2023
Lucknow, India

- **ICMS – Illegal Construction Monitoring System** • Developed zone-wise dashboards and automated workflows, improving case tracking efficiency by **35%** and reducing manual monitoring effort • Integrated Angular11+ UI with Node.js + MongoDB APIs for real-time case tracking and improved monitoring accuracy.
- **HRMS – Attendance & ACR System** • Built attendance and ACR workflows, reducing manual HR workload by **50%** and improving process transparency and RBAC-based permission hierarchies. • Digitized multi-level approval flows, reducing manual HR workload and increasing process transparency.
- **Ionic Attendance App** • Developed a GPS-based attendance system with offline mode, improving attendance accuracy by **40%** and reducing fraudulent check-ins • Built an admin module for real-time employee location monitoring, attendance logs, and override actions. • Worked on Node.js + MySQL backend services supporting real-time dashboards.

PROJECTS

Pharmacy Application

Pharmacy Management Application

- Built desktop UI using Java AWT for billing, stock management, and automated low-stock notifications. • Implemented MySQL backend for reliable, persistent storage.

Village Population Analytics System

- Designed database models for family-tree mapping, demographics, literacy, and population insights. • Enabled analysis for literacy rates, gender ratio, and household categorization.

EDUCATION

MCA

University Of Lucknow

2020 – 2022
Lucknow, India
